Advance Directives

An "Advance Directive" is a general term that refers to your instructions about your medical care in the event you become unable to voice these instructions yourself. Each state regulates advance directives differently. State laws regarding Advanced Directives are found in Kansas Statutes Chapter 65, Article 28.101-109. In the state of Kansas, a patient has the right to make decisions about their healthcare

through a written document that tells doctors and health care providers how you would want medical decisions you have made to be carried out. An Advance Directive will allow you to make decisions about your future health care if you are not able to make those decisions at the time treatment is recommended. It also tells your doctor and loved ones what treatment you want or do not want. There are two basic kinds of Advance Directives: living wills and durable power of attorney for health care decisions. http://kansasstatutes.lesterama.org/Chapter_65/Article_28/#65-28,101

You have the right to informed decision making regarding your care, including information regarding Advance Directives and this facility's policy on Advance Directives. Applicable state forms will also be provided upon request. A member of our staff will be discussing Advance Directives with the patient (and/or patient's representative or surrogate) prior to the procedure being performed.

Associated Eye Surgical Center respects the right of patients to make informed decisions regarding their care. The Center has adopted the position that an ambulatory surgical center setting is not the most appropriate setting for end of life decisions. Therefore, it is the policy of this surgical center that in the absence of an applicable properly executed Advance Directive, if there is deterioration in the patient's condition during treatment at the surgical center, the personnel at the center will initiate resuscitative or other stabilizing measures. The patient will be transferred to an acute care hospital, where further treatment decisions will be made.

If the patient has Advance Directives which have been provided to the surgical center that impact resuscitative measures being taken, we

will discuss the treatment plan with the patient and his/her physician to determine the appropriate course of action to be taken regarding the patient's care.

Complaints/Grievances

If you have a problem or complaint, please speak to one of our staff to address your concern. If necessary, your problem will be advanced to center management for resolution.
